

Subject: Douglas Albright – Game Director & Developer (25+ Years Exp)

To the Valve Team,

I am applying to Valve with 25+ years as a Studio Founder, Creative Director, and “full-stack” game developer. After founding Signal Studios, building and shipping the *Toy Soldiers* franchise, and managing a 55+ person studio, I am eager to return to a hands-on, collaborative team focused on shipping exceptional products.

My career has been defined by bridging the gap between high-level creative vision and technical implementation. At Signal Studios, I didn’t just direct; I pitched, built, and shipped. *Toy Soldiers* (D.I.C.E. nominated) proved I can identify a market niche, implement a unique mechanic, and drive a project to critical and commercial success on Steam.

Currently, as a solo developer working on a massive-scale historical RPG in Godot, I have returned to the metal—writing my own shaders, managing procedural generation pipelines, and integrating AI workflows. This recent work demonstrates that, despite my executive experience, my primary passion remains solving complex development problems and creating direct value for players.

I recognize that Valve values self-driven individuals who are experts in one field but capable across many. My background in Art (Snowblind, EA), Design/Direction (Signal), and Code (Godot/C#) empowers me to contribute immediately to any team, whether optimizing an art pipeline, refining game feel, or prototyping new systems.

I have been a Valve/Steam partner for over a decade. I would be honored to bring my experience to the other side of the table to help build the next generation of world-class games and tools.

My resume is attached, and I look forward to the opportunity to discuss how I can contribute.

Best regards,

Douglas R. Albright III
